

Kaumini Samodhi Kapuliyadda

Undergraduate Student | B.Sc. Physical Science (ICT) | University of Sri Jayewardenepura

+94 76 006 4801 | kauminisk123@gmail.com | github.com/kauminisk123-ux | Kadirana, Negombo, Sri Lanka

PROFESSIONAL OBJECTIVE

Motivated and detail-oriented 2nd year B.Sc. Physical Science (ICT) student with a strong foundation in full-stack development, object-oriented programming, and DevOps practices. Passionate about building clean, functional web applications and eager to apply technical skills in a real-world environment through an internship or collaborative project.

EDUCATION

B.Sc. in Physical Science (Information Communication Technology) 2023 — Present

Faculty of Applied Sciences | University of Sri Jayewardenepura

Currently in 2nd year. Relevant modules include Java, Databases, Web Development, DSA, OOP, Full Stack Development, and DevOps.

Advanced Certificate in ICT — BCI

August 2021

Completed a structured ICT certification covering core computing concepts and practical skills.

TECHNICAL SKILLS

Programming Languages	Java (main), Python (basics)
Web Development	HTML, CSS, JavaScript (learning), React & Node.js (building)
CS Fundamentals	Data Structures & Algorithms, OOP, Database Design
Tools & Platforms	Git, GitHub, CI/CD (learning)
Office & Productivity	Microsoft Office Suite

PROJECTS

HarvestHub — Agricultural Marketplace In Progress

Stack: MongoDB | Express | React | Node.js | Multer

- Full-stack group project for 2nd year final module (ICT2022 — Fullstack Development).
- Marketplace platform connecting Sri Lankan farmers directly with buyers, eliminating middlemen.
- Implemented role-based access for three user types: Farmer, Buyer, and Administrator.

Logistics Management System Completed

Stack: Java

- Java-based system to manage logistics operations built in 1st year, 1st semester.
- Learned how to structure classes, handle user input, and plan a system before writing code.

Sales Management System Completed

Stack: Java | OOP

- OOP-based sales management system built in 1st year, 2nd semester.
- Applied core OOP concepts including inheritance and encapsulation in a practical project.

Pizzrella Website Completed

Stack: HTML | CSS

- Pizza shop frontend website. First project focused seriously on layout, spacing, and design.

PetCare Website

Completed

Stack: [HTML](#) | [CSS](#)

- Pet care services website. Practiced CSS flexbox and building consistent page structure.

SKILLS & COMPETENCIES

- Self-Directed Learning — independently learning JavaScript, React and Node.js beyond coursework requirements.
- Team Collaboration — working in a 5-member group for HarvestHub across all development layers.
- Problem Solving & Debugging — researching and iterating solutions when facing technical challenges.
- Version Control — managing project code using Git and GitHub with structured commit history.
- Technical Documentation — writing formal project proposals and README documentation.
- Attention to Detail — iterating through multiple versions of projects to achieve clean, polished results.
- Time Management — managing concurrent coursework across Physics, Mathematics and ICT modules simultaneously.
